PROJECT DESCRIPTION

Cluster Group Affiliation—Women

Congressional Districts Served—Miami/ Dade County

Purpose, Goals and Objectives—The overall purpose of this project is to improve the health and well-being of substance abusing members of the target population. Specific Targeted Capacity Expansion project goals are to reduce the incidence and prevalence of alcohol and other drug abuse among male and female members of the target population and to increase the psychosocial functioning level of recovering members of that population.

Target Population/Geographic Service Area—The target population of this TCE project is male and female substance abusers who are members of the Non-English Speaking Hispanic community of Miami-Dade County, Florida.

Service Providers—The Village, Inc., under contract to the Florida Department of Children and Families, will provide direct clinical services to TCE clients.

Services Provided—Using the Village Step-Down Model, a seamless continuum of client specific services will be provided. The focus of the TCE project is expansion of both residential and intensive outpatient services.

Desired Project Outputs—The project intends to serve 150 adult male and female clients.

EVALUATION

Strategy and Design—The Village has a record of providing high quality evaluation services to federally funded substance abuse projects. They will employ a multistage approach with recurrent client assessment at entry, 6 months later, and at 1 year after entry. The design incorporates GPRA as a stand alone instrument.

Evaluation Goals/Desired Results—The goal is to determine the degree to which program process variables meet expectations, and to determine if interventions have the intended effects on treatment outcomes.

Instruments and Data Management—The GPRA, treatment protocols, Initial Evaluation Form, SASSI, ASI, and SISAR will be used to collect data on each TCE client.
